

Senior Web Developer - Paris - ISSN International Centre

Work and progress on a modern and evolving technological stack in the heart of Paris (3rd arrondissement) while enjoying partial telecommuting!

The ISSN International Center is an intergovernmental organization, founded in 1975 by a treaty between France and UNESCO. The Center employs a staff of 15 and cooperates with ISSN National Centers in over 90 countries.

The main activities of the ISSN International Centre are the following:

- Manage the ISSN Registry, the international, standardized database of print and online serial publications,
- Make ISSN data available on the ISSN Portal (portal.issn.org) and manage associated services such as ROAD (road.issn.org), TAS (journaltransfer.issn.org) and Keepers Registry (keepers.issn.org),
- Coordinate the activities of the ISSN National Centres that share their data with the International Center,
- Assign ISSN identifiers and create descriptive metadata for publications of international organizations and those produced in countries without a national centre.

Within the IT team of 3 people, **your role will be as follows:**

- Provide the highest level of quality for digital projects, including continuous integration, unit testing, integration and functional testing, and well-designed, high-performance code,
- Develop and maintain, with an agile practice, the ISSN+ production and cataloguing tool and the ISSN Portal in Drupal,
- Perform maintenance and administration of other web tools and the data feeds on which they depend,
- Contribute to the administration and monitoring of production servers,
- Assist end users in an international environment,
- Create user and technical documentation.

Skills:

- At least 3 years of experience in collaborative IT projects,
- Practice of the JavaScript language and the Web in general (HTML, CSS ...),
- Practice of at least one server side programming language (Python, PHP, Java),
- Knowledge of at least one common CMS (Drupal, Wordpress...) and SQL (PostgreSQL) and NoSQL (ElasticSearch) databases,
- Knowledge of GNU/Linux and its ecosystem,
- Knowledge and practice of Git,
- Experience in development and project management in agile mode,
- Good problem solving, organizational and time management skills,
- Excellent oral and written communication skills,

- Fluent in English and French,
- Knowledge of the information management world and bibliographic data would be an asset.

Salary and status:

- +/- 45 K€ gross depending on experience
- International status (net salary not subject to income tax and CSG)
- Partial telecommuting possible
- Full time job (35 hours per week)
- 36 days of annual leave
- 2-year renewable contract
- Meal tickets paid for at 60% by the Centre

Contact:

Please send an email to Ms. Gaëlle Béquet, Director (secretariat@issn.org), describing your experience, your strengths and your expectations.

A link to public profiles (Github, LinkedIn, etc.) and two professional references are required.

Interviews will begin in June 2021.
