

## **URGENT: Recruitment of a senior Full Stack Developer**

### **ISSN International Centre, Paris**

#### **Work and progress on a modern and evolving technological stack in the heart of Paris (3rd district) and in partial telecommuting!**

The ISSN International Centre / CIEPS (<http://www.issn.org>) is an intergovernmental organization, founded in 1975 by a treaty between France and UNESCO. The Centre employs a staff of 15 and cooperates with national centres in over 90 countries.

The main activities of the ISSN International Centre are as follows:

- Manage the ISSN Registry, the international, standardized database of print and online serial publications,
- Make ISSN data available on the ISSN portal ([portal.issn.org](http://portal.issn.org)) and manage associated services, i.e. ROAD ([road.issn.org](http://road.issn.org)), ETAS ([journaltransfer.issn.org](http://journaltransfer.issn.org)) and Keepers Registry ([keepers.issn.org](http://keepers.issn.org)),
- Coordinate the activities of the ISSN national centres that share their data with the International Centre,
- Assign ISSN identifiers and create descriptive metadata for publications of international organizations and publications produced in countries without a national ISSN centre.

Within the IT team of 3 people, **your mission will be the following:**

- Provide the highest level of quality for digital projects, including continuous integration, unit testing, integration and functional testing, and well-designed, high-performance code,
- Develop and maintain, with an agile practice, the ISSN+ network production and cataloguing tool (Python, Javascript) and the ISSN portal (Drupal),
- Maintain and administer other web tools and the data feeds on which they depend,
- Contribute to the administration and monitoring of production servers,
- Assist end users in an international environment,
- Create user and technical documentation.

#### **Skills:**

- Minimum 3-year experience in collaborative IT projects,
- Practice of the JavaScript language and Web technologies (HTML, CSS ...),
- Practice of at least one server side programming language (Python, PHP, Java),
- Knowledge of at least one common CMS (Drupal, Wordpress...) and SQL (PostgreSQL) and NoSQL (ElasticSearch) databases,
- Knowledge of GNU/Linux and its ecosystem,
- Knowledge and practice of Git,

- Experience in development and project management in agile mode,
- Good problem solving, organizational and time management skills,
- Excellent oral and written communication skills,
- Fluent in English and French,
- Knowledge of the documentation world and bibliographic data management is an asset.

**Salary and status:**

- +/- 45 K€ gross depending on experience
- International status (net salary not subject to income tax in France nor CSG)
- Telecommuting 3 days/week
- Full time job (35 hours per week)
- 36 days of annual leave
- 2-year renewable contract
- 60% of the cost of luncheon vouchers is covered by the Centre

Full Staff Regulations are available here : [https://www.issn.org/wp-content/uploads/2020/12/Staff-Regulations\\_rev\\_Sept\\_2020\\_ENGL\\_siteweb.pdf](https://www.issn.org/wp-content/uploads/2020/12/Staff-Regulations_rev_Sept_2020_ENGL_siteweb.pdf)

**Contact:**

Please send an email to Ms. Gaëlle Béquet, Director ([recrutement@issn.org](mailto:recrutement@issn.org)), describing your experience, your assets, your expectations and your availability.

Please include a link to public profiles (Github, LinkedIn, etc.) and at least one professional reference (specify names, positions and contact information).
